

# PROTECTIVE COATING

# TIVACOAT™

**TIVACOAT™** is a single-component, liquid-applied protective coating used as a waterproofing membrane for ledgers, beams, joists, posts and more. With the combination of high quality bitumen and various polymers, **TIVACOAT™** forms a high-performance elastomeric waterproof membrane. Containing no solvents, **TIVACOAT™** is non-flammable, with excellent uv, adhesion and chemical resistance.

**LEDGERS, BEAMS, JOISTS, POSTS AND MORE... [TIVABP.COM](http://TIVABP.COM)**

## TIVACOAT PERFORMANCE FEATURES

- Waterproof membrane.
- Easy to apply - precise application.
- Excellent adhesion to virtually any surface.
- No VOC's, No solvents and No harmful odours.
- Resists cracking, chipping and peeling.
- Highly flexible.
- Organic growth resistant.
- Non-flammable.
- Apply in temperatures above 5 °C /41 °F. Freeze/thaw stable after applied and cured. Store in temperatures above freezing - product will freeze in can.

## TIVACOAT BENEFITS

- One gallon covers approximately 400-500 sq. ft. of deck framing (600 - 800 lin. ft. of framing).
- That's 55-75% SAVINGS compared to taping for same lin. ft.
- No job site waste and debris, unlike taping.
- Can be sealed and re-used for a later application or touch ups.
